

One Of Zombies

a game of zombies

Presentation

- Fernando Guillen
- <http://fernandoguillen.info>

On Of Zombies

another game about zombies

- Strategy game... went to a kill everything game.
- Propose: save the innocent... went to a not any final game.

Disclaimer

I'm warning you :)

```
def colisions~  
  @bullets.each do |bullet|~  
    @zombies.each do |zombie|~  
      if Gosu::distance(bullet.x, bullet.y, zombie.x, zombie.y) < 10 then~  
        @hero.score += 10~  
        @beep.play~  
        @bullets.delete( bullet )~  
        ~  
        zombie.life -= 1~  
        ~  
      end~  
    end~  
  end~  
end~
```

- Not quality code... not at all.
- First time I put my self on a pure Ruby

Fast Tutorial

the purpose

- Save the innocents.

Fast Tutorial

do it fast

- The innocents will be infected.

Fast Tutorial

the panel

- It will say to you very important info.

The History

of course there is a history

- You're thirteen years old girl, you have lost every thing, but you have a gun.

The History

of course there is a history

- Your monsters aren't on your dreams anymore.

The History

of course there is a history

- Not other person would comeback to finish the job.

The History

of course there is a history

- There are still innocent survivors on the town.

Let's play
just to be it is real

- We will do it easy

AI

anything is called intelligence

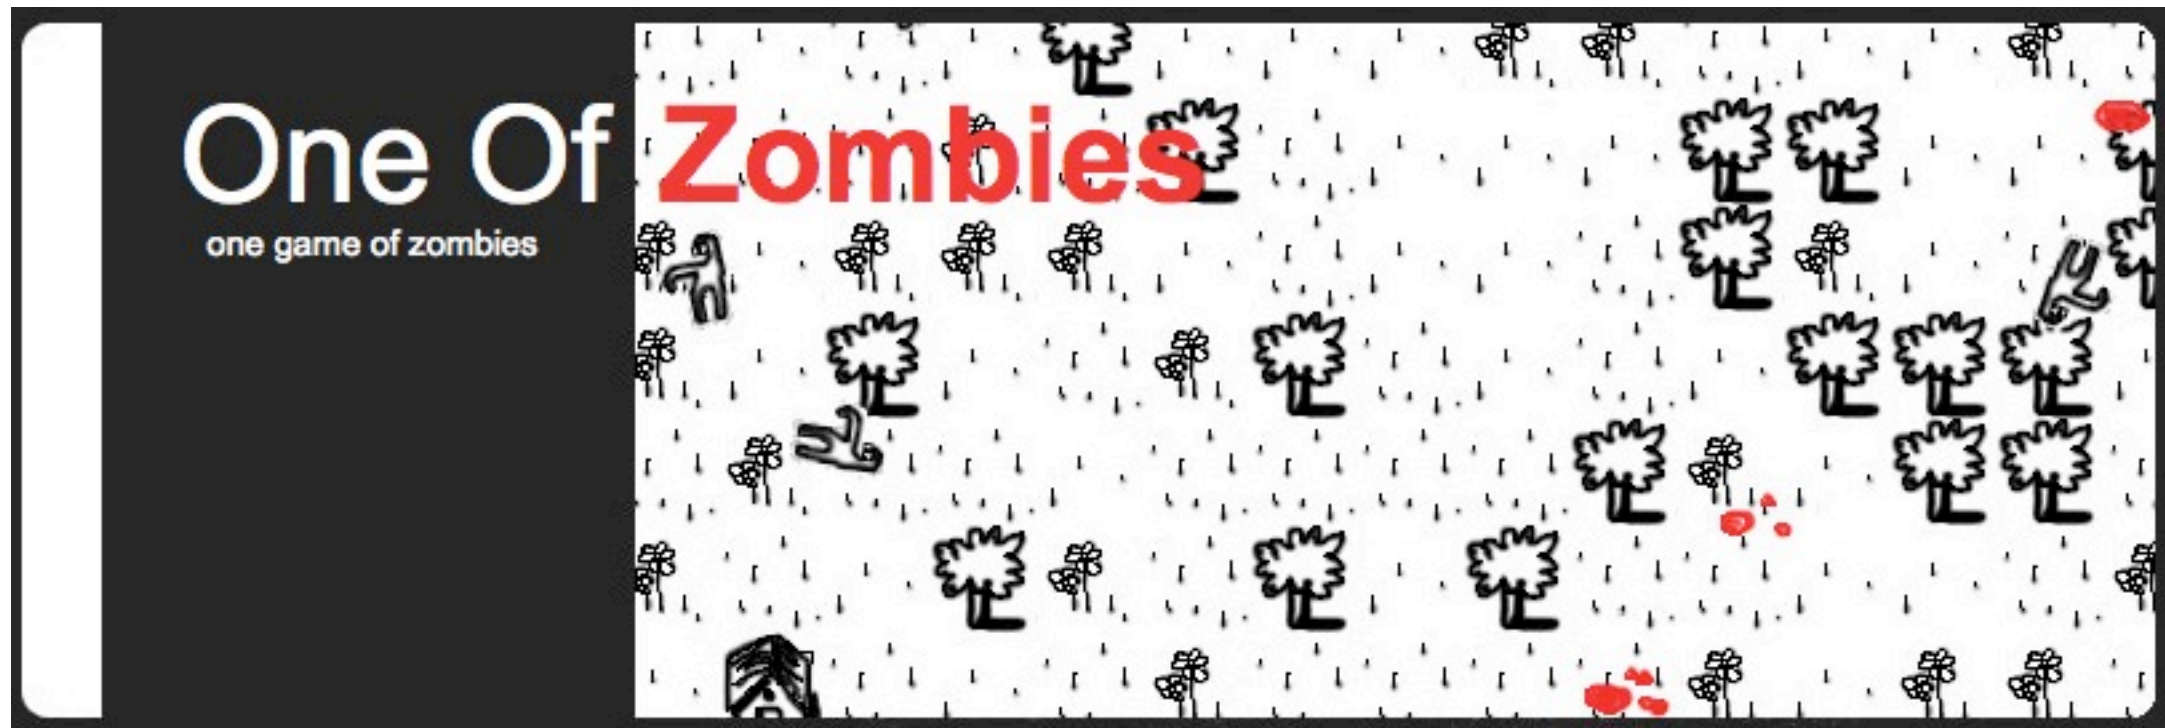

- Antiobjects
- Collaborative Diffusion
- Floor vibrations

Thanks to it should be longer

- **Javier Ramirez** and his talk about Gosu
<http://app.euruko2009.org/talks/9-fun-with-ruby-and-without-r-s-program-your-own-games-with-gosu>
- **Tonypa** for his amazing *tile based games programming tuto*
<http://www.tonypa.pri.ee/tbw/start.html>
- **Alexander Repenning** for his hard *theory about collaborative diffusion and antiobjects*
<http://www.cs.colorado.edu/~ralex/papers/PDF/OOPSLA06antiobjects.pdf>
- **Dahrkael** for his comments and for the *Windows binary version*
